

My History

My name is Mayra, I studied computer engineering, I'm from Ecuador, I worked making applications for the bank. I lived in Quito which is the capital of my country, Quito is a very beautiful city in the Andes surrounded by mountains and beautiful landscapes, from my house I could see the whole city.

I have a sister and a brother, I am an aunt of 5 children, my sister has 2 children and my brother 3 children. I like to read, the last book was psychoanalysis, I also like to go on excursions to the mountains and sometimes go out with friends. I love puppies very much and I have 4 dogs in my country. I have learned to spend time alone and I enjoy it very much.

I am here to improve professionally and have more experience. Being here is a great challenge because there is only me from my country, but if I make an effort, I will achieve my goal.
